

# HIGH QUALITY ZIPPERS

*Swiss Precision, Quality and Reliability*

*What makes a Riri zipper so special?*

- *Elongated teeth so that the slider rides on the extended teeth there by avoiding abrading the woven textile tape.*
- *Plastic grid on the bottom of the zippers facilitates handling and adds stiffness to assist inserting the pin into the box.*
- *Unique one piece casted slider for additional strength.*
- *One of a kind puller attachment system reduces the chance that the puller and slider body will separate. Twice as strong as competitors!*

*Choosing a Riri zipper shows the particular care and attention to quality and detail taken in the manufacturing of this product.*

*The Riri Group based in Mendrisio, Switzerland, since 1936 is the leader in the production and sales of high quality zippers, manufactured in metal, zinc alloy or injected plastic.*
